*Malleable Mara* Jun 22 2019 Analyzes the breadth of representations of the mythic figure of Māra in Buddhism to reveal how closely tied such narratives are to the social and historical concerns of Buddhist communities. 2019 CHOICE Outstanding Academic Title This is the first book to examine the development of the figure of Māra, who appears across Buddhist traditions as a personification of death and desire. Portrayed as a combination of god and demon, Māra serves as a key antagonist to the Buddha, his followers, and Buddhist teaching in general. From ancient India to later Buddhist thought in East Asia to

more recent representations in Western culture and media, Māra has been used to satirize Hindu divinities, taken the form of wrathful Tibetan gods, communicated psychoanalytic tropes, and appeared as a villain in episodes of Doctor Who. Michael D. Nichols details and surveys the historical transformations of the Māra figure and demonstrates how different Buddhist communities at different times have used this symbol to react to changing social and historical circumstances. Employing literary and cultural theory, Nichols argues that the representation of Māra closely parallels and reflects the social concerns and anxieties of the particular Buddhist community producing it. Michael D. Nichols is Associate Professor of Philosophy/Religion at Saint Joseph's College.

*Constructing Collectivity* Apr 24 2022 This is the first edited volume dedicated specifically to first person non-singular reference ('we'). Its aim is to explore the interplay between the grammatical means that a language offers for accomplishing collective self-reference and the socio-pragmatic - broadly speaking - functions of 'we'. Besides an introduction, which offers an overview of the problems and issues associated with first person non-singular reference, the volume comprises fifteen chapters that cover languages as diverse as, e.g., Dutch, Greek, Hebrew, Cha'palaa and Norf'k, and various interactional and genre-specific contexts of spoken and written discourse. It, thus, effectively demonstrates the complexity of collective self-reference and the diversity of phenomena that become relevant when 'we' is not examined in isolation but within the context of situated language use. The book will be of particular interest to researchers working on person deixis and reference, personal pronouns, collective identities, etc., but will also appeal to linguists whose work lies at the interface between grammar and pragmatics, sociolinguistics, discourse and conversation analysis.

**Tarnished Hero** May 02 2020 James mark Sullivan was part of the post-famine Irish immigration to the United States in the late 19th century. Overcoming family misfortune, he moved from newsboy to journalist to Yale-educated lawyer. Relocating to New York City, his association with Tammany Hall involved him in the "Crime of the Century" Becker-Rosenthal murder case, a role not previously explored. Sullivan's involvement won him a patronage appointment as ambassador to Santo Domingo. Scandals about graft and corruption forced his resignation. However, another factor which contributed to his dismissal, unexplained until now, was his effort at subversion of his government's policy of neutrality, which was connected to his ties to Irish nationalism. He later established the first indigenous Irish film company with a pronounced Nationalist agenda, making several films which are now classics of the silent film era. Following the death of his wife and son during the influenza epidemic of 1918, he returned to the United States. Failing to revive his legal career, he removed to Florida, dying in relative obscurity.

*Levels in Clause Linkage* Sep 25 2019 This is a cross-linguistic exploration of the use of clause linkage markers in causal, conditional, and concessive sentences. Employing a five-level classification of clause linkage based on semantic and pragmatic grounds, it shows that, within individual languages different markers exhibit different distributions on the five levels. Also, the rich evidence presented from seventeen

languages from many parts of the world documents that these distributions present commonalities as well as differences across the languages of the sample.

**Opera Production II** Aug 24 2019 Opera Production II was first published in 1974. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. For the world of opera this is an indispensable basic reference work which provides essential information about more than 350 operas. Producers, singers, directors, students, orchestras, and audiences will find useful, concise information in this handbook, a sequel to the author's earlier book Opera Production I: A Handbook, which contains similar information about more than 500 other operas. While the first volume concentrates on more familiar operas, this book is devoted principally to lesser known works, both old and new, including many as yet unperformed contemporary operas. The details given about each opera are those needed to assess the production requirements for a given work: the number and importance of settings; size of orchestra, chorus, and ballet; number of singers, their relative importance and individual requirements; vocal and acting demands of performers, including vocal ranges in most cases; plot synopsis; and brief historical material to anchor the reader in the necessary knowledge of the period and source of the libretto. The information is compressed into capsule form so that anyone using the book can tell at a glance the suitability of a work to the particular facilities, talents, or tastes of an opera company or its public. In addition to the reference material, there is a chapter "Production Problems in Handel's Opera" by Randolph Mickelson, a helpful feature since nine of Handel's operas are included and they are apt to pose special production problems.
