New School Macramé Mar 31 2020 Macramé is a fibre medium that has been around for centuries, and yet there are still revolutionary ways to modernize and elevate the knots. In this book, fibre artist Terri Watson shares her new school approach to creating contemporary knotted macramé canvases, using just a few simple knots. Terri has been shaking up fibre traditions for years with her vertical clove hitch knot tapestries, choosing to explore an unprecedented style, and shaping an emergent fibre phenomenon. If you have ever wanted to learn tips and tricks from one of the pioneers of this style, look no further! In this book, Terri candidly shares many of her tried, true, and top secret (shhhh!) knotting techniques: including how to create vertical clove hitch knot fibre art that is as polished on the back as it is on the front; how to finish a piece using her signature streamlined scroll finish; how to incorporate different colours to create beautiful knotted tapestries. By following the step-by-step instructions in this book, you too can learn to design and create your own macramé 'canvases' patterns like a pro! This book features ten projects that Terri will walk you through start to finish, followed by an extensive library of over 100 patterns and designs that you can use to create a wide variety of your own projects — wall art, plant hangers, pot covers, garlands, table mats, and even show-stopping denim jacket panels that will turn your threads into walking works of art. Consider this book a manual that will help you unlock your knotting potential, and create fibre artworks that even your mother-in-law will enjoy.

The Trapper's Guide - A Manual of Instructions Jul 16 2021 Originally published in 1867. The author was the designer and manufacturer of the famous Newhouse range of animal traps. This well illustrated book contains detailed chapters on:- Capturing All Kinds of Fur Bearing Animals - Curing Their Skins - Observations on the Fur Trade - Hints on Life in the Woods - Narratives on Trapping and Hunting - History of the Newhouse Trap - Fishing in Autumn and Winter - Food Hunting - Boat Building etc. Many of the earliest hunting and shooting books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Home Farm Books are republishing many of these classic works in affordable, high quality, modern editions, using the original text and artwork.

Miles From Home: The Journey of a Lifetime Aug 24 2019 Miles From Home is a deeply personal story and a narrative of the American dream. Born to a devoted mother and severely alcoholic father, Phillip Lee Woods was sent as an 11 year old to live with a taciturn grandfather on a lonely farm in Indiana's countryside. Doing backbreaking chores from daybreak to dark and walking a long, deserted road to catch the bus, Woods' school years were marked by toil, embarrassment about his circumstances, and a yearning to reunite with his mother and sister. Living in an isolated farmhouse with no indoor plumbing, no phone, and little heat, Woods and his grandfather helped each other to survive. These challenging early experiences helped the young Woods become a determined, perseverant man. Woods started out as a postal clerk, and despite not having a college education, he went on to found his own successful insurance business, Woods & Grooms, Inc. Along the way, he married his favorite post office patron and had a family of his own. His climb to ultimate success was riddled with many failures, including near bankruptcies and unsuccessful forays into raising horses and running a flight school. But more than a story of the American dream – of a man who, like many, started with nothing and went on to achieve success and serve his community- this is a love story, not just between Woods and his wife of more than 50 years, but between Woods and America. At the age of 66, he decided to walk across the country from east to west, determined to see its roads again close up and meet its inhabitants in person. He wanted to see the country not as politicians and lobbyists were formulating it, but see it as a land of individuals who had their own values, their own opinions. In 2010, Woods again walked across the Unites States, from north to south, a testament to what a stout heart, a devoted wife, and a few good pairs of sneakers could accomplish. This is the tale of a long, winding journey. Readers of Woods' story respond to the at times heartbreakingly honest narrative, to the tale of a life of struggle, triumphs, failures, and tragedies, but most of all they are inspired by the can-do spirit of a man who insists we all keep moving.

2007 National Construction Estimator Nov 27 2019 Over 30,000 Construction Costs on Every Area of Construction! The National Construction Estimator is our most popular book for pricing construction, and has been for years. It has proven to be the industry standard for construction costs. Here's why: Material Costs: You'll find the current cost of every commonly-used construction material and thousands of specialties...based on typical selling prices of building material dealers. Labor Costs: Typical costs to the contractor (including taxes and insurance) to install each of the thousands of materials listed...along with typical manhours per unit. Wage modifications are listed for nearly every city plus most Canadian provinces. Wage breakdowns by trade are listed for 24 construction trades. Subcontract Costs: Bid prices most frequently quoted by specialty contractors...including the sub's overhead and profit. FREE CD-ROM: Includes an electronic version of the book with a stand-alone estimating program & tutorial and price updates

Products Liability Depositions May 14 2021 1 Looseleaf Volume. Forms. Index. Updated Annually. One of the key components of success in litigating products liability cases

is taking effective discovery depositions. *Products Liability Depositions* is a book entirely devoted to the subject of how to go about preparing for and taking depositions that will provide you with the necessary materials for building a successful case. The book contains sample depositions from actual cases that illustrate the many techniques that can be used to develop useful testimony. It also provides practical and time saving suggestions on how to prepare for taking the important depositions in a products liability case. The book also provides a handy source of quick information regarding the legal doctrines that apply to products liability cases. There is a section briefly describing the substantive law applicable to products cases from each of the 50 states. This section allows quick access to answers such as what affirmative defenses are available to a strict liability claim in a given state. This section alone makes this book a necessary addition to any products liability lawyers office library.
