Risk Intelligent Supply Chains Mar 12 2021 The Turkish economy is very dynamic and growing at phenomenal speeds. For instance, Turkey's first quarter GDP growth rate was 11 percent in 2011. This growth brings its own risks and benefits. The lessons learned from surviving and thriving in such an environment can be applied to supply chains in any country. Packed with interesting and timely examples from industries such as automotive, airline, and manufacturing, *Risk Intelligent Supply Chains: How Leading Turkish Companies Thrive in the Age of Fragility* presents strategic insights from various leading Turkish companies regarding their management of supply chain risks. Çağrı Haksöz brings the risk intelligent supply chain (RISC) concept to life for the first time. It answers the question of how to become a risk intelligent supply chain. He proposes the I-Quartet Model with four essential roles "Integrator, Inquirer, Improviser, and Ingenious," that any supply chain network must play to become risk intelligent. The book also presents never-before-published cases and practices of leading Turkish companies that thrive globally in the age of fragility with their supply chain risk intelligence. While providing real-life examples, the book also shares insights obtained in various scientific disciplines. It provides not only an industry focus but also details numerous industry approaches, analyzing their similarities and differences in a manner that allows each industry to learn from the other.

Source-Full Intelligence Jul 24 2019 *Source-Full Intelligence, Understanding Uniqueness and Oneness through Education* is a groundbreaking book which will give you an entirely new understanding of holistic education. Written by an internationally renowned educator, teacher trainer and researcher, the book is intended for all who love and care for children and young adults. It details the toxicity of our educational systems and offers viable alternatives in order to make the process of education a joyful one for learners. It urges all care givers and educators to begin by developing their own Source-full Intelligence to enable them to understand the dual capacity that we humans have of conceptualising and experiencing our uniqueness and oneness, and pass on this understanding to learners. With the help of two lesson plans in the final chapter, it demonstrates how we can fruitfully replace the Self-versus-Other consciousness with a Self-and-Other consciousness and lead children to an even higher awareness that all is Self and there is in fact, no Other. By courageously examining our own belief systems and replacing delimiting beliefs with life-enhancing ones, each one of us can, in our own unique way, contribute towards making our rapidly shrinking and increasingly threatened world a better place for ourselves and for the generations to come.
