The Columbia Basin Project Jan 10 2021

Air-Conditioning in Modern American Architecture, 1890–1970 Mar 31 2020 Air-Conditioning in Modern American Architecture, 1890–1970, documents how architects made environmental technologies into resources that helped shape their spatial and formal aesthetic. In doing so, it sheds important new light on the ways in which mechanical engineering has been assimilated into the culture of architecture as one facet of its broader modernist project. Tracing the development and architectural integration of air-conditioning from its origins in the late nineteenth century to the advent of the environmental movement in the early 1970s, Joseph M. Siry shows how the incorporation of mechanical systems into modernism's discourse of functionality profoundly shaped the work of some of the movement's leading architects, such as Dankmar Adler, Louis Sullivan, Frank Lloyd Wright, Ludwig Mies van der Rohe, Gordon Bunshaft, and Louis Kahn. For them, the modernist ideal of functionality was incompletely realized if it did not wholly assimilate heating, cooling, ventilating, and artificial lighting. Bridging the history of technology and the history of architecture, Siry discusses air-conditioning's technical and social history and provides case studies of buildings by the master architects who brought this technology into the conceptual and formal project of modernism. A monumental work by a renowned expert in American modernist architecture, this book asks us to see canonical modernist buildings through a mechanical engineering-oriented lens. It will be especially valuable to scholars and students of architecture, modernism, the history of technology, and American history.

Records and Briefs of the United States Supreme Court Jan 22 2022

Marktanalyseinstrumente und Marketingmix für das Projekt „Kinderprodukt für einen Sekthersteller“ Oct 19 2021 Die hier vorliegende Arbeit steht im direkten Zusammenhang mit der Case Study „Marketingkonzept für ein Kinderpartygetränk“, die ebenfalls für das Modul Consulting Engineer angefertigt wurde. Daher sollte sie nicht losgelöst von dieser betrachtet werden. Die Aufgabenstellung für diese Fallstudie lautet: „Sie sind der Marketingberater einer bedeutenden Sektkellerei in Deutschland. Ihr Kunde (Rotkäppchen Sektkellerei GmbH) überlegt, wie er mit einer neuen Marke Kinder im Alter ab 8 Jahren erreichen kann. Entwickeln Sie eine Produktidee, machen Sie eine Marktanalyse und formulieren Sie auf dieser Grundlage ein Ziel, eine geeignete Marketingstrategie, einen Marketingmix und eine Beraterempfehlung.“ In der Case Study (CS) wurde bereits das Unternehmen vorgestellt, eine Umweltanalyse durchgeführt, ein Marketingziel formuliert, das Produkt vorgestellt und die Marketingstrategie erläutert. Der daraus resultierende Marketingmix wurde nur oberflächlich dargelegt. In dieser SCA werden im ersten Teil die bei der Mikro- und Makroanalyse erwähnten Analyseinstrumente angewendet und detailliert dargestellt. Dabei wird zunächst auf die theoretischen Grundlagen eingegangen und anschließend die Technik auf die gestellte Aufgabenstellung angewendet. Im zweiten Teil wird der in der CS bereits vorgestellte Marketingmix hinsichtlich der Kommunikation noch genauer ausgearbeitet und dargelegt. Abschließend werden die Ergebnisse der Analysetechniken reflektiert und ein Gesamtfazit gezogen.
