request header in php stack overflow

how can i check if a program exists from a bash script Aug 11 2021 i just tested and using shopt u expand aliases ignores hides aliases like the alias ls ls f mentioned in another answer and shopt s expand aliases resolves them via command v so perhaps it should be set prior to the check and unset after though it could affect the function return value if you don t capture and return the output of the command call explicitly

is there a meta tag to turn off caching in all browsers Oct 21 2019 see answer here how to control web page caching across all browsers for ie9 and before do not blindly copy paste this the list is just examples of different techniques it s not for direct insertion if copied the second would overwrite the first and the fourth would overwrite the third because of the equiv declarations and fail with the w3c validator at most one could
