The Bibliographer's Manual of English Literature Nov 19 2021

The Work of Print Jul 24 2019 Traces a shift in the very definition of literature, from one that encompasses the material conditions of the production and distribution of books to the more familiar emphasis on the solitary author's ownership of an abstract text. Drawing on contemporary accounts of printers, booksellers, publishers, and distributors, the author examines attitudes about the creative process and approaches to the commodification of writing.

The Lithographers Manual Jun 02 2020

The Printing Ink Manual Mar 24 2022 The Printing Ink Manual was first published in 1961 under the auspices of the Society of British Printing Ink Manufacturers with the object of providing an authoritative work on printing ink technology. This, the fourth edition, continues that purpose and presents a comprehensive study of the current 'state of the art' in the ink industry. For those starting in the printing ink industry it is a textbook dealing with all aspects of the formulation and manufacture of printing ink. For the ink technician it is a practical manual and useful source of reference. For printers and users of printed material the manual supplies helpful information on the nature and behaviour of ink both on the printing press and as the finished print. Readers with a little scientific knowledge will have no difficulty in using the manual. but as in previous editions, sufficient chemistry and physics have been introduced to assist the advanced technician and research scientist.

The Printer's Manual Oct 31 2022 As printing from movable type was perfected in the fifteenth century, the mysteries of its practice were guarded by a privileged few. The rapid spread of the new art depended on the reliable mechanism for transferring knowledge. By the end of the seventeenth century, however, the pioneers of manufacturing technology and scientific inquiry were prying away at trade secrecy. This book shows the history of printing manuals from 1683 to the end of the nineteenth century, including some of the rarest in existence from the Cary Collection at Rochester institute of Technology.

Nineteenth-century Printing Practices and the Iron Handpress Mar 31 2020 Examines of printing techniques from the late-seventeenth-century through the nineteenth-century. Using selected readings from printers' manuals - beginning with Joseph Moxon's *Mechanick Exercises on the Whole Art of Printing*, 1683, and culminating with John Southward's *Practical Printing*, 1900.

A Manual of Approved Practices in Printing Mar 12 2021

A MANUAL OF STYLE with SPECIMENS OF TYPE Nov 27 2019

Women and Letterpress Printing 1920–2020 Jan 22 2022 This Element analyses the relationship between gender and literary letterpress printing from the early 20th century to the beginning of the 21st. Drawing on examples from modernist writer/printers of the 1920s to literary book artists of the early 21st, it offers a way of thinking about the feminist historiography of printing as we confront the presence and particular character of letterpress in a digital age. This Element is divided into four sections: the first, 'Historicizing' traces the critical histories of women and print through to the twentieth and twenty-first centuries. The second section, 'Learning,' offers an analysis of some of the modes of discourse and training through which women and gender minorities have learned the craft of printing. The third section, 'Individualizing' offers brief biographical vignettes. The fourth section, 'Writing,' focuses on printers' own written reflections about letterpress. This title is also available as Open Access on Cambridge Core.
