Mapping the World Aug 22 2019 "There are many ways to tell a story. Textbooks offer narratives, crafted by an historian or a team of historians. Collections of primary sources present a mosaic of stories, often interspersed with pictures of artwork and other physical objects drawn from the past. *Mapping the World* takes advantage of the strength of maps to tell a different sort of story. The maps are divided into two groups: a) Reference maps that provide a brief outline of key events and developments in global history; b) blank outline maps and accompanying exercises that offer opportunities to explore the past in a hands-on fashion."--Provided by publisher.

The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750–Present, Part 1, Structures, Spaces, and Boundary Making Jul 21 2019 Since 1750, the world has become ever more connected, with processes of production and destruction no longer limited by land- or water-based modes of transport and communication. Volume 7 of the Cambridge World History series, divided into two books, offers a variety of angles of vision on the increasingly interconnected history of humankind. The first book examines structures, spaces, and processes within which and through which the modern world was created, including the environment, energy, technology, population, disease, law, industrialization, imperialism, decolonization, nationalism, and socialism, along with key world regions.

The Industrial Turn in World History May 31 2020 In *The Industrial Turn in World History*, Peter N. Stearns presents a concise yet far reaching overview of the worldwide shift from agricultural societies to industrial societies over the past two centuries. Putting the implications for individuals and societies in global context while simultaneously considering the limits of generalization across cultures, Stearns's text explores the nature of industrialization across national and regional lines. Rather than portraying the Industrial Revolution as primarily a Western, early 19th-century development, this new narrative argues that the move to industrial societies is an ongoing and truly global shift. Taking a largely social and cultural approach, Stearns engages with the leading-edge approach of looking at emotion historically—allowing readers to ask questions about the impact of industrial society on emotional experience and happiness levels. This innovating framing allows for use in a variety of courses, including world history, economic history, and more general courses on the Industrial Revolution.

Teaching World History Thematically Feb 26 2020 This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6-12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents--including speeches by queens and rebels, ancient artifacts, and social media posts--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the "master narrative" of world history from figures like Queen Nzinga and Huda Sha'arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Patterns of World History Aug 26 2022 Patterns of World History offers a distinct framework for understanding the global past through the study of origins, interactions, and adaptations. Authors Peter von Sivers, Charles A. Desnoyers, and George Stow--each specialists in their respective fields--examine the full range of human ingenuity over time and space in a comprehensive, even-handed, and critical fashion. The book helps students to see and understand patterns through: ORIGINS - INTERACTIONS - ADAPTATIONS These key features show the O-I-A framework in action: * Seeing Patterns, a list of key questions at the beginning of each chapter, focuses students on the 3-5 over-arching patterns, which are revisited, considered, and synthesized at the end of the chapter in Thinking Through Patterns. * Each chapter includes a Patterns Up Close case study that brings into sharp relief the O-I-A pattern using a specific idea or thing that has developed in human history (and helped, in turn, develop human history), like the innovation of the Chinese writing system or religious syncretism in India. Each case study clearly shows how an innovation originated either in one geographical center or independently in several different centers. It demonstrates how, as people in the centers interacted with their neighbors, the neighbors adapted to--and in many cases were transformed by--the idea, object, or event. Adaptations include the entire spectrum of human responses, ranging from outright rejection to creative borrowing and, at times, forced acceptance. * Concept Maps at the end of each chapter use compelling graphical representations of ideas and information to help students remember and relate the big patterns of the chapter.
