Advances in Information Retrieval Feb 20 2022 This book constitutes the refereed proceedings of the 33rd annual European Conference on Information Retrieval Research, ECIR 2011, held in Dublin, Ireland, in April 2010. The 45 revised full papers presented together with 24 poster papers, 17 short papers, and 6 tool demonstrations were carefully reviewed and selected from 223 full research paper submissions and 64 poster/demo submissions. The papers are organized in topical sections on text categorization, recommender systems, Web IR, IR evaluation, IR for Social Networks, cross-language IR, IR theory, multimedia IR, IR applications, interactive IR, and question answering /NLP.

Current Research Topics in Applied Microbiology and Microbial Biotechnology Feb 29 2020 This book contains a compilation of papers presented at the II International Conference on Environmental, Industrial and Applied Microbiology (BioMicroWorld2007) held in Seville, Spain on 28 November 1 December 2007, where over 550 researchers from about 60 countries attended and presented their cutting-edge research. The main goals of this book are to: (1) identify new approaches and research opportunities in applied microbiology, presenting works that link microbiology with research areas usually related to other scientific and engineering disciplines; and (2) communicate current research priorities and progress in the field. The contents of this book mirror this focus. Microbiologists interested in environmental, industrial and applied microbiology and, in general, scientists whose research fields are related to applied microbiology can find an overview of the current state of the art in the topic. In addition to the more general topic, some chapters are devoted to specific branches of microbiology research, such as bioremediation; biosurfactants; microbial factories; biotechnologically relevant enzymes and proteins; microbial physiology, metabolism and gene expression; and future bioindustries.

Writing, Grades 5 - 8 Apr 12 2021 Write on! Write with students in grades 5 and up using Writing: Fundamentals for the Middle-School Classroom. This 128-page book helps students learn how to express themselves through writing. It provides open-ended lessons of personal writing, descriptive writing, short stories, poetry, and reports. This excellent classroom supplement also includes chapters arranged in order of increasing difficulty and activities that allow students to choose their own writing topics. It supports NCTE and IRA standards.

Semantic Web and Web Science Jan 10 2021 The book will focus on exploiting state of the art research in semantic web and web science. The rapidly evolving world-wide-web has led to revolutionary changes in the whole of society. The research and development of the semantic web covers a number of global standards of the web and cutting edge technologies, such as: linked data, social semantic web, semantic web search, smart data integration, semantic web mining and web scale computing. These proceedings are from the 6th Chinese Semantics Web Symposium.

Multiagent System Technologies Mar 31 2020 This book constitutes the refereed proceedings of the 7th German Conference on Multiagent Systems Technologies, MATES 2009, held in Hamburg, Germany in September 2009 - colocated with the 10th International Workshop on Computational Logic in Multi-Agent Systems (CLIMA X) and the 5th International Workshop on Modelling of Objects, Components, and Agents (MOCA 2009). The 14 revised full papers, 10 short papers, and 5 exhibition papers presented together with one invited talk were carefully reviewed and selected from 44 submissions. The papers present and discuss the latest advances of research and development in the area of autonomous agents and multiagent systems ranging from theoretical and methodological issues to applications in various fields.

Research Topics in Graph Theory and Its Applications Aug 29 2022 This book considers a number of research topics in graph theory and its applications, including ideas devoted to alpha-discrepancy, strongly perfect graphs, reconstruction conjectures, graph invariants, hereditary classes of graphs, and embedding graphs on topological surfaces. It also discusses applications of graph theory, such as transport networks and hazard assessments based on unified networks. The book is ideal for developers of grant proposals and researchers interested in exploring new areas of graph theory and its applications.

AQA Economics Student Guide 2: The national economy in a global context Nov 27 2019 Exam Board: AQA Level: AS/A-level Subject: Economics Written by experienced authors Ray and James Powell, this Student Guide for Economics focuses on the key topics of economic performance and macroeconomic policy in a global context. The first section, Content Guidance, summarises content needed for the exams, with knowledge-check questions throughout. The second section, Questions and Answers, provides samples of different questions and student answers with examples of how many marks are available for each question. Students can: - Identify key content for the exams with our concise summary of topics - Find out what examiners are looking for with our Questions and Answers section - Test their knowledge with rapid-fire questions and answers - Avoid common pitfalls with clear definitions and exam tips throughout - Reinforce their learning with bullet-list summaries at the end of each section

Supporting Research Writing May 14 2021 Supporting Research Writing explores the range of services designed to facilitate academic writing and publication in English by non-native English-speaking (NNES) authors. It analyses the realities of offering services such as education, translation, editing and writing, and then considers the challenges and benefits that result when these boundaries are consciously blurred. It thus provides an opportunity for readers to reflect on their professional roles and the services that will best serve their clients' needs. A recurring theme is, therefore, the interaction between language professional and client-author. The book offers insights into the opportunities and challenges presented by considering ourselves first and foremost as writing support professionals, differing in our primary approach (through teaching, translating, editing, writing, or a combination of those) but with a common goal. This view has major consequences for the training of professionals who support English-language publication by NNES academics and scientists. Supporting Research Writing will

therefore be a stimulus to professional development for those who support English-language publication in real-life contexts and an important resource for those entering the profession. Takes a holistic approach to writing support and reveals how it is best conceived as a spectrum of overlapping and interrelated professional activities Stresses the importance of understanding the real-world needs of authors in their quest to publish Provides insights into the approaches used by experienced practitioners across Europe

Cutting-Edge Research Topics on Multiple Criteria Decision Making Oct 31 2022 MCDM 2009, the 20th International Conference on Multiple-Criteria Decision Making, emerged as a global forum dedicated to the sharing of original research results and practical development experiences among researchers and application developers from different multiple-criteria decision making-related areas such as multiple-criteria decision aiding, multiple criteria classification, ranking, and sorting, multiple objective continuous and combinatorial optimization, multiple objective metaheuristics, multiple-criteria decision making and preference modeling, and fuzzy multiple-criteria decision making. The theme for MCDM 2009 was "New State of MCDM in the 21st Century." The conference seeks solutions to challenging problems facing the development of multiple-criteria decision making, and shapes future directions of research by promoting high-quality, novel and daring research findings. With the MCDM conference, these new challenges and tools can easily be shared with the multiple-criteria decision making community. The workshop program included nine workshops which focused on different topics in new research challenges and initiatives of MCDM. We received more than 350 submissions for all the workshops, out of which 121 were accepted. This includes 72 regular papers and 49 short papers. We would like to thank all workshop organizers and the Program Committee for the excellent work in maintaining the conference's standing for high-quality papers.

1000 Ideas for Term Papers in World Literature Jan 22 2022

Introduction to Research - E-Book Sep 17 2021 Bridge the gap between research and practice with *Introduction to Research: Understanding and Applying Multiple Strategies*, 5th Edition. This easy-to-read edition covers all the major research design strategies: qualitative, quantitative, naturalistic, experimental-type, and mixed method. And with the text's up-to-date research information and references, you will have a solid foundation from which to critique and understand research designs and their applications to healthcare and human service settings. Case examples provide real-life snapshots of what it is like to participate in different types of research processes, identify research dilemmas relevant to chapter subjects, and alert you to problems you might encounter. Authors make the topics more accessible, so research becomes more relevant - and topics come to life. Covers experimental-type, naturalistic, and mixed method design strategies to improve your ability to compare, contrast, and integrate different methods. Presents complex information clearly in a highly readable, and easy-to-understand, manner. Includes detailed discussions of qualitative and quantitative methodologies, a unique and balanced focus that makes this text more comprehensive than others in its field. NEW! Up-to-date research methods, strategies, and references, like digital sources, visual methods, and geographical analysis, give you the latest information on research in diverse areas of health and human services.

Shock Waves Sep 25 2019 Shock wave research covers important interdisciplinary areas which range from basic topics on gasdynamics, combustion and detonation, physico-chemistry of high temperature gases, plasma physics, astro and geophysics, materials science, astronautics and space technology to medical and industrial applications. This book includes 202 papers presented at the 18th the International Symposium on Shock Waves which describe the research frontier of shock wave phenomena and 14 plenary lectures which show the state of the art of various fields of shock wave research. This proceedings is a unique collection of most important and updated shock wave research.

Libraries and Research Jun 14 2021

Multiple Criteria Problem Solving Jul 04 2020 The objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving. This conference was an outgrowth of an earlier conference I organized with Herve Thiriez at CESA, Jouy-en-Josas, France in 1975 during my stay at the European Institute in Brussels. When I re-joined the State University of New York at Buffalo that year, I began to search for potential sponsors for this conference. Approximately one year later when the prospects began to look promising, I contacted several individuals to act as an informal coordinating committee for the conference. I wanted to avoid biasing the conference completely to my way of thinking! The members of this committee were Jim Dyer, Peter Fishburn, Ralph Keeney, Bernard Roy (Universite de Paris IX Dauphine who was unable to participate in the conference), and Milan Zeleny. Though the committee did not meet, per se, their inputs regarding format, possible participants, number of participants, length of the conference, and so on were of great value to me in planning and organizing the conference. I wish to acknowledge the contributions of this group. We were most fortunate in obtaining the financial support of the European Institute for Advanced Studies in Management, Brussels (one of the sponsors of the Jouy-en-Josas conference), the Office of Naval Research, and the State University of New York at Buffalo.

'Subordination' versus 'Coordination' in Sentence and Text Aug 24 2019 The papers collected in this volume (including a comprehensive introduction) investigate semantic and discourse-related aspects of subordination and coordination, in particular the relationship between subordination/coordination at the sentence level and subordination/coordination - or hierarchical/non-hierarchical organization - at the discourse level. The contributions in part I are concerned with central theoretical questions; part II consists of corpus-based cross-linguistic studies of clause combining and discourse structure, involving at least two of the languages English, German, Dutch, French and Norwegian; part III contains papers addressing specific - predominantly semantic - topics relating to German, English or French; and the papers in part IV approach the topic of subordination, coordination and rhetorical relations from a diachronic (Old Indic and Early Germanic) perspective. The book aims to contribute to a better understanding of information packaging on the sentence and text level related, within a particular language as well as cross-linguistically.

Tubular Structures XV Jan 28 2020 Tubular Structures XV contains the latest scientific and engineering developments in the field of tubular structures, as presented at the 15th International Symposium on Tubular Structures (ISTS15, Rio de Janeiro, Brazil, 27-29 May 2015). The International Symposium on Tubular Structures (ISTS) has a long-standing reputation for being the principal

GRE Analytical Writing: Solutions to the Real Essay Topics - Book 1 Sep 29 2022 GRE Analytical Writing: Solutions to the Real Essay Topics - Book 1 includes detailed strategies to tackle the Analytical Writing section! This book includes: · 73 Solved Issue and Argument Topics · Detailed and Expert Strategies to approach the tasks · Scoring Guides · Overview of the GRE (updated after Covid-19) · 2 GRE Study Plans (online) · Stress Management Techniques (online) The 73 solved issue and argument tasks are divided into categories of Arts, Education, Government and Politics, Philosophy, Science and Technology, and Society. This will enable you to practice a wide variety of essay topics and make you familiar with the actual question types in the GRE. Detailed strategies to approach each Issue and Argument task are also included to give you an insight into the process of writing a logically sound essay. These detailed strategies will enhance your critical thinking skills, help you organize your thoughts, and pen them down in a timed environment. The book also includes an overview of the GRE General Test that will make it easier to understand the format of the test. Additionally, a detailed scoring guide for the two tasks in the book allows you to comprehend the scoring process and gives you a chance to improve your weak areas to get the best possible score! About Test Prep Series The focus of the Test Prep Series is to make test preparation streamlined and fruitful for competitive exam aspirants. Students preparing for the entrance exams can now access the most comprehensive series of prep guides for GRE, GMAT, ACT, and SAT preparation. All the books in this series are thoroughly researched, frequently updated, and packed with relevant content that has been prepared by authors with more than a decade of experience in the field.

Human-Computer Interaction -- INTERACT 2013 Sep 05 2020 The four-volume set LNCS 8117-8120 constitutes the refereed proceedings of the 14th IFIP TC13 International Conference on Human-Computer Interaction, INTERACT 2013, held in Cape Town, South Africa, in September 2013. The 55 papers included in the second volume are organized in topical sections on E-input/output devices (e-readers, whiteboards), facilitating social behaviour and collaboration, gaze-enabled interaction design, gesture and tactile user interfaces, gesture-based user interface design and interaction, health/medical devices, humans and robots, human-work interaction design, interface layout and data entry, learning and knowledge-sharing, learning tools, learning contexts, managing the UX, mobile interaction design,

and mobile phone applications.

*Advising on research methods Jul 16 2021 More information: www.jvank.nl/ARMSelected Advising on research methods: Selected topics 2012 results from a research master course Methodological Advice that was given at the University of Amsterdam, fall 2012 by Don Mellenbergh and Herman Adèr. The objectives of this course were: (a) to acquire methodological knowledge that is needed for advising researchers in the behavioral and social sciences, and (b) to get experience with methodological consultancy. The main material for the course was the book: *Advising on research methods: a consultant's companion* by Herman J. Adèr and Gideon J. Mellenbergh (with contributions by David J. Hand). The students had to fulfill various assignments, one of which was to write a paper on a topic that may come up during methodological consultancy. In the beginning of the course, paper topics were selected from a list of relevant methodological issues. The publication process of drafting, submitting, reviewing, adapting and correcting was the same as in the production of any other edited paper collection.*

Hierarchical Decision Modeling Jul 24 2019 This volume, developed in honor of Dr. Dundar F. Kocaoglu, aims to demonstrate the applications of the Hierarchical Decision Model (HDM) in different sectors and its capacity in decision analysis. It is comprised of essays from noted scholars, academics and researchers of engineering and technology management around the world. This book is organized into five parts: Technology Policy Planning, Strategic Technology Planning, Technology Assessment, Application Extensions, and Methodology Extensions. Dr. Dundar F. Kocaoglu is one of the pioneers of multiple decision models using hierarchies, and creator of the HDM in decision analysis. HDM is a mission-oriented method for evaluation and/or selection among alternatives. A wide range of alternatives can be considered, including but not limited to, different technologies, projects, markets, jobs, products, cities to live in, houses to buy, apartments to rent, and schools to attend. Dr. Kocaoglu's approach has been adopted for decision problems in many industrial sectors, including electronics research and development, education, government planning, agriculture, energy, technology transfer, semiconductor manufacturing, and has influenced policy locally, nationally, and internationally. Moreover, his students developed advanced tools and software applications to further improve and enhance the robustness of the HDM approach. Dr. Kocaoglu has made many contributions to the field of Engineering and Technology Management. During his tenure at Portland State University, he founded the Engineering and Technology Management program, where he served as Program Director and later, Department Chair. He also started the Portland International Conference on Management of Engineering and Technology (PICMET), which organizes an annual conference in international locations such as Korea, Turkey, South Africa, Thailand, and Japan. His teaching has won awards and resulted in a strong sense of student loyalty among his students even decades later. Through his academic work and research, Dr. Kocaoglu has strongly supported researchers of engineering management and has provided tremendous service to the field. This volume recognizes and celebrates Dr. Kocaoglu's profound contributions to the field, and will serve as a resource for generations of researchers, practitioners and students.

Working Paper Series Dec 29 2019

Research Topics in Analysis, Volume I Jun 26 2022 This book, which is the first of two volumes, presents, in a unique way, some of the most relevant research tools of modern analysis. This work empowers young researchers with all the necessary techniques to explore the various subfields of this broad subject, and introduces relevant frameworks where these tools can be immediately deployed. Volume I starts with the foundations of modern analysis. The first three chapters are devoted to topology, measure theory, and functional analysis. Chapter 4 offers a comprehensive analysis of the main function spaces, while Chapter 5 covers more concrete subjects, like multivariate analysis, which are closely related to applications and more difficult to find in compact form. Chapter 6 deals with smooth and non-smooth calculus of functions; Chapter 7 introduces certain important classes of nonlinear operators; and Chapter 8 complements the previous three chapters with topics of variational analysis. Each chapter of this volume finishes with a list of problems – handy for understanding and self-study – and historical notes that give the reader a more vivid picture of how the theory developed. Volume II consists of various applications using the tools and techniques developed in this volume. By offering a clear and wide picture of the tools and applications of modern analysis, this work can be of great benefit not only to mature graduate students seeking topics for research, but also to experienced researchers with an interest in this vast and rich field of mathematics.

Research Priorities for Airborne Particulate Matter Apr 24 2022 In 1997, the U.S. Environmental Protection Agency (EPA) established regulatory standards to address health risks posed by inhaling tiny particles from smoke, vehicle exhaust, and other sources. At the same time, Congress and the EPA began a multimillion dollar research effort to better understand the sources of these airborne particles, the levels of exposure to people, and the ways that these particles cause disease. To provide independent guidance to the EPA, Congress asked the National Research Council to study the relevant issues. The result was a series of four reports on the particulate-matter research program. The first two books offered a conceptual framework for a national research program, identified the 10 most critical research needs, and described the recommended timing and estimated costs of such research. The third volume began the task of assessing initial progress made in implementing the research program. This, the fourth and final volume, gauged research progress made over a 5-year period on each of the 10 research topics. The National Research Council concludes that particulate matter research has led to a better understanding of the health effects caused by tiny airborne particles. However, the EPA, in concert with other agencies, should continue research to reduce further uncertainties and inform long-term decisions.

*Smart Women: The Search for America's Historic All - Women Study Clubs Oct 19 2021 Hiding in plain sight throughout America are historic, highly private women's self-education groups. These clubs are fascinating survivors from an era following the Civil War when women couldn't apply to most colleges and were told they shouldn't leave the home. In their earliest days, the study groups also contributed to the welfare of their towns - often by helping to found their town's first library-and served to get women out of the house and into the world. Today's all-women study clubs have no civic component but still fashion their meetings as their founding great-grandmothers did, with members taking turns giving original papers. In *Smart Women*, author Ann Dodds Costello discusses her four-year quest to locate, often visit, and describe today's 100-year-old, all-women study clubs, all over America, even though they do not publicize and have no central organization or knowledge of each other. Included: an invaluable, first-ever directory of most of the book's ninety-plus clubs.*

Ideas and Details Dec 09 2020 This brief rhetoric takes the approach that good writing combines fresh ideas energized by vivid details.

Group Decision and Negotiation. A Socio-Technical Perspective Aug 05 2020 This book constitutes the refereed proceedings of the 17th International Conference on Group Decision and Negotiation, GDN 2017, held in Stuttgart, Germany, in August 2017. The field of Group Decision and Negotiation focuses on decision processes with at least two participants and a common goal but conflicting individual goals. Research areas of Group Decision and Negotiation include electronic negotiations, experiments, the role of emotions in group decision and negotiations, preference elicitation and decision support for group decisions and negotiations, and conflict resolution principles. The 14 full papers presented in this volume were carefully reviewed and selected from 87 submissions. They were organized in topical sections named: general topics in group decision and negotiation; conflict resolution; emotions in group decision and negotiation; negotiation support systems and studies; and preference modeling for group decision and negotiation. The book also contains two invited talks in full paper length.

Do I Dare Disturb the Universe? May 02 2020 A memoir of race and education, this is the story of a girl who grew up and out of the Cleveland projects in the 1960s and '70s. While growing up in Cleveland, young Charlise Lyles experienced turbulent events including race riots and a neighborhood murder. Yet she was inspired to appreciate literature at a young age, and she spent her days reading—and also often searching for the estranged father who taught her that love of learning. Despite starting in the “slow class” at an aging school on Cleveland's east side, Lyles had a thirst for knowledge and drive for success that would open a door to new opportunities. Granted a scholarship to a prestigious prep school in a wealthy suburb, the vibrant teenager finds herself presented with a bewildering set of new challenges—and a new direction in life.
