Desistance Transitions and the Impact of Probation Feb 29 2020 Moving away from criminal behaviour can be fraught with difficulties. Often it can involve leaving behind old habits, customs, and even friends, while at the same time adopting a new way of life. How do individuals go about making a decision to give up crime? How do they plan to sustain this decision? And in what ways does probation help? This book explores these questions. Based on in-depth interviews with a group of men under probation supervision, Sam King investigates the factors associated with making a decision to desist from crime. The book examines strategies for desistance, and explores the factors that individuals consider when they are thinking about how they will desist. In doing so, the book sheds new light on existing understandings of desistance from crime and helps to develop our understandings of the role that individuals play in constructing their own desistance journeys. This book also highlights the role of probation in this process, offering a timely and critical review of the nature of probation under the New Labour government in the UK between 1997-2010. The findings indicate that we should allow Probation Officers greater autonomy and discretion within their roles, and that we should free them from the bureaucracy of risk assessment and targets. Moreover, the book warns against the potential fragmentation of community supervision. As such, the book will be of interest to criminology students, researchers, academics, policymakers and practitioners, particularly those who work with ex-offenders in the community.

When Britain Saved the West Jul 24 2019 How Britain, standing alone, persevered in the face of near-certain defeat at the hands of Nazi Germany From the comfortable distance of seven decades, it is quite easy to view the victory of the Allies over Hitler's Germany as inevitable. But in 1940 Great Britain's defeat loomed perilously close, and no other nation stepped up to confront the Nazi threat. In this cogently argued book, Robin Prior delves into the documents of the time--war diaries, combat reports, Home Security's daily files, and much more--to uncover how Britain endured a year of menacing crises. The book reassesses key events of 1940--crises that were recognized as such at the time and others not fully appreciated. Prior examines Neville Chamberlain's government, Churchill's opponents, the collapse of France, the Battle of Britain, and the Blitz. He looks critically at the position of the United States before Pearl Harbor, and at Roosevelt's response to the crisis. Prior concludes that the nation was saved through a combination of political leadership, British Expeditionary Force determination and skill, Royal Air Force and Navy efforts to return soldiers to the homeland, and the determination of the people to fight on "in spite of all terror." As eloquent as it is controversial, this book exposes the full import of events in 1940, when Britain fought alone and Western civilization hung in the balance.

**TRIPS Agreement of the WTO Aug 17 2021** This book examines the application of the World Trade Organization's (WTO) Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS) in the fields of agriculture, public health and economic development in a Least Developed Country (LDC) such as Bangladesh. In particular, it evaluates the question whether the TRIPS' one-size-fits-all approach compulsorily applicable for all countries, irrespective of their development standing, fulfils the developmental needs of Bangladesh and other such LDCs in the fields of agriculture, public health and economic development. The book shows that the TRIPS' introduction of IPRs in the name of Plant Varieties Protection (PVP) and patents not only secures private sector investment in agriculture but also brings traditional agricultural practices within the spectrum of private monopoly, increases the price of agricultural products and forces people into dependency on engineered seeds and other agricultural inputs. To guard against such trade rules, this book recommends that Bangladesh should incorporate the TRIPS flexibilities in the form of redefining patentable invention, choosing between patents and PVP and providing for compulsory licensing. This book also reveals that the TRIPS patenting in pharmaceuticals encourages innovations by ensuring royalty collections and protects public health by raising standards of living. However, patenting offers exclusivity to pharmaceutical companies, extending the duration of the patent term and establishing their control over production, supply and distribution. Such control results in exclusivity over drug pricing. The flexibilities of the compliance deadline, compulsory licensing, and parallel importation built into the TRIPS are set to tackle untenable situations arising from patenting exclusivity. However, patent laws in most LDCs are out-dated in terms of dealing with such flexibilities. Given this, the research recommends that Bangladesh should invoke the TRIPS flexibilities. The author of this book further establishes that the TRIPS' standard-setting in agriculture and pharmaceuticals does not help the country to fulfil subsistence needs or promote economic development through innovation. However, the appropriation of agricultural and pharmaceutical goods during the use of the TRIPS flexibilities has the potential to feed the people, protect public health interests and increase economic development with the supply of food and drugs at home and abroad. To this end, the research asks Bangladesh to reform its existing IPRs provisions by redefining patentable inventions and simplifying compulsory licensing and other differential treatments to appropriate foreign technologies.

The Routledge Companion to Ethnic Marketing Nov 19 2021 The globalization of marketing has brought about an interesting paradox: as the discipline becomes more global, the need to understand cultural differences becomes all the more crucial. This is the challenge in an increasingly international marketplace and a problem that the world's most powerful businesses must solve. From this challenge has grown the exciting discipline of ethnic marketing, which seeks to understand the considerable opportunities and challenges presented by cultural and ethnic diversity in the marketplace. To date, scholarship in the area has been lively but disparate. This volume brings together cutting-edge research on ethnic marketing from thought leaders across the world. Each chapter covers a key theme, reflecting the increasing diversity of the latest research, including models of culture change, parenting and socialization, responses to web and advertising, role of space and social innovation in ethnic marketing, ethnic consumer decision making, religiosity, differing attitudes to materialism, acculturation, targeting and ethical and public policy issues. The result is a solid framework and a comprehensive reference point for consumer researchers, students, and practitioners.

*Media and Communication in the Chinese Diaspora* Jun 14 2021 The rise of China has brought about a dramatic increase in the rate of migration from mainland China. At the same time, the Chinese government has embarked on a full-scale push for the internationalisation of Chinese media and culture. Media and communication have therefore become crucial factors in shaping the increasingly fraught politics of transnational Chinese communities. This book explores the changing nature of these communities, and reveals their dynamic and complex relationship to the media in a range of countries worldwide. Overall, the book highlights a number of ways in which China's "going global" policy interacts with other factors in significantly reshaping the content and contours of the diasporic Chinese media landscape. In doing so, this book constitutes a major rethinking of Chinese transnationalism in the twenty-first century.

*The SARS Epidemic* Mar 31 2020 In the first half of 2003, severe acute respiratory syndrome (SARS) struck China (including Hong Kong), causing panic and claiming many lives. The unknown nature of SARS at that time also jolted the economic growth of China and Hong Kong, disrupted the social life of their citizens and created much stress and strain for their political systems and governance. Like other major crises, the management of the SARS crisis provides a good opportunity to examine the strengths and weaknesses of the political systems in China and Hong Kong. From the outset, scholars at the East Asian Institute (EAI) followed closely the unfolding of the disease in China, particularly how each of the two societies coped with this random external shock.

SARS may or may not recur in the near future, but the episode has offered a glimpse into the extent of resilience of the two societies, the quality of their political leadership, the effectiveness of their political and institutional mobilization, the crisis-management capability of their respective bureaucracies, and the viability of their governance systems. This volume is the result of an EAI workshop on "SARS in China: Crises and Responses". **Smart Women: The Search for America's Historic All - Women Study Clubs Jan 28 2020** Hiding in plain sight throughout America are historic, highly private women's self-education groups. These clubs are fascinating survivors from an era following the Civil War when women couldn't apply to most colleges and were told they shouldn't leave the home. In their earliest days, the study groups also contributed to the welfare of their towns - often by helping to found their town's first library-and served to get women out of the house and into the world. Today's all-women study clubs have no civic component but still fashion their meetings as their founding great-grandmothers did, with members taking turns giving original papers. In Smart Women, author Ann Dodds Costello discusses her four-year quest to locate, often visit, and describe today's 100-year-old, all-women study clubs, all over America, even though they do not publicize and have no central organization or knowledge of each other. Included: an invaluable, first-ever directory of most of the book's ninety-plus clubs.

**The Elder Sons of George III Feb 20 2022** For nearly 60 years, King George III reigned over a tumultuous kingdom. His health and realm were in turmoil, while family life held challenges of its own. From the corpulent Prinky and the Grand Old Duke of York, to a king who battled the Lords and the disciplinarian Duke of Kent, this is the story of the elder sons of George III. Born over the course of half a decade of upheaval, George, Frederick, William, and Edward defined an era. Their scandals intrigued the nation and their efforts to build lives away from the shadow of their impossibly pious parents led them down diverse paths. Whether devoting their lives to the military or to pleasure, every moment was captured in the full glare of the spotlight. The sons of George III were prepared from infancy to take their place on the world's stage, but as the king's health failed and the country lurched from one drama to the next, they found that duty was easier said than done. With scandalous romances, illegal marriages, rumors of corruption and even the odd kidnapping plot, their lives were as breathless as they were dramatic. In The Elder Sons of George III: Kings, Princes, and a Grand Old Duke, travel from Great Britain to America and on to Hanover in the company of princes who were sometimes scandalous, sometimes sensational, but never, ever dull.

**Two Decades of Market Reform in India Oct 19 2021** Have neoliberal policies truly yielded beneficial effects for India? 'Two Decades of Market Reform in India' presents a collection of essays that challenge the conventional wisdom of Indian market reforms, examining the effects of neoliberal policies enacted by the Indian government and exploding the myths that surround them. In particular, the volume questions the perceived benefits of India's reform policies in the areas of growth, agriculture, industry and poverty alleviation, and examines how the government's focus on preventing a fiscal deficit caused a large-scale decline in development expenditures, which in turn has had a negative impact on the well-being of the poor. With its rich and insightful analysis, 'Two Decades of Market Reform in India' bravely shines a light on the true implications of India's neoliberal governmental policies, and provides a revealing indication of how policy reform since 1991 has, at times, detrimentally affected the general populace of India.

**The Society of Prisoners** Oct 07 2020 In the eighteenth century, as wars between Britain, France, and their allies raged across the world, hundreds of thousands of people were captured, detained, or exchanged. They were shipped across oceans, marched across continents, or held in an indeterminate limbo. The Society of Prisoners challenges us to rethink the paradoxes of the prisoner of war, defined at once as an enemy and as a fellow human being whose life must be spared. Amidst the emergence of new codifications of international law, the practical distinctions between a prisoner of war, a hostage, a criminal, and a slave were not always clear-cut. Renaud Morieux's vivid and lucid account uses war captivity as a point of departure, investigating how the state transformed itself at war, and how whole societies experienced international conflicts. The detention of foreigners on home soil created the conditions for multifaceted exchanges with the host populations, involving prison guards, priests, pedlars, and philanthropists. Thus, while the imprisonment of enemies signals the extension of Anglo-French rivalry throughout the world, the mass incarceration of foreign soldiers and sailors also illustrates the persistence of non-conflictual relations amidst war. Taking the reader beyond Britain and France, as far as the West Indies and St Helena, this story resonates in our own time, questioning the dividing line between war and peace, and forcing us to confront the untenable situations in which the status of the enemy is left to the whim of the captor.

**Innovative Vertriebsmöglichkeiten für journalistischen Online-Content deutscher Tageszeitungen: Die personalisierte E-Paper-Tageszeitung** Aug 29 2022 Die grundlegende Wandlungsbereitschaft bestimmt sich aus dem gesellschaftlichen Wandel von der Industrie- zur Informationsgesellschaft. Diese Veränderungen betreffen auch Medienunternehmen. Wyss beschreibt diese neuartige Situation insofern, als dass Medienunternehmen damit konfrontiert werden, ihre publizistischen Leistungen neu zu überdenken, diese dem veränderten Mediennutzungsverhalten, den soziokulturellen Veränderungen, der wirtschaftlichen Umstrukturierung und neuen technischen Imperativen anzupassen und die Qualität ihrer Angebote entsprechend zu sichern. Diese Anpassungen verlangen von den Medienunternehmen ein viel stärkeres Antizipieren der Leserinteressen, als es bisher der Fall war. Die Menge an verfügbaren Informationen, hinweg über alle Medienformen und Kanäle, hat das bisherige System der Abhängigkeit des Lesers von den Medienproduzenten vollkommen umgekehrt. Die Bedürfnisse des Einzelnen stehen im Fokus, was insbesondere der Mega-Trend der Individualisierung verdeutlicht. Für die Medienunternehmen bedeutet dies eine radikale Veränderung. Die Medienprodukte werden spezialisiert, fragmentiert und personalisiert.

**Privacy and Security in the Digital Age** Mar 12 2021 Privacy and data protection are recognized as fundamental human rights. Recent developments, however, indicate that security issues are used to undermine these fundamental rights. As new technologies effectively facilitate collection, storage, processing and combination of personal data government agencies take advantage for their own purposes. Increasingly, and for other reasons, the business sector threatens the privacy of citizens as well. The contributions to this book explore the different aspects of the relationship between technology and privacy. The emergence of new technologies threaten increasingly privacy and/or data protection; however, little is known about the potential of these technologies that call for innovative and prospective analysis, or even new conceptual frameworks. Technology and privacy are two intertwined notions that must be jointly analyzed and faced. Technology is a social practice that embodies the capacity of societies to transform themselves by creating the possibility to generate and manipulate not only physical objects, but also symbols, cultural forms and social relations. In turn, privacy describes a vital and complex aspect of these social relations. Thus technology influences people's understanding of privacy, and people's understanding of privacy is a key factor in defining the direction of technological development. This book was originally published as a special issue of Innovation: The European Journal of Social Science Research.
