It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

Thanks to this international accounting standard, Italian listed companies have included a greater number of disclosures on financial risks in their financial statements, but while there is no doubt the quantitative increase in information, the qualitative value of this communication is doubtful. In this regard, the study analyzes the usefulness of the disclosure introduced by IFRS 7 for financial analysts. The choice of analysts is a natural choice due to the importance they hold as intermediaries in the communication channel between companies and the market.
