Nursing Staff Development Jan 27 2020

Juta's Manual of Nursing May 31 2020 The basics of fundamental and general nursing science are presented in this health resource for auxiliary, enrolled, and registered general nurses. A strong community nursing focus infuses the outcome-based teachings and questions to stimulate further discussion. Practical information on nursing in South Africa is provided, including working in the legal framework, managing the challenges of nursing in a culturally diverse society, and dealing with patients suffering from HIV and AIDS. Medical teachings on the use of oxygen, temperature regulation, mobility, and skin integrity complement the ethical discussions.

THE NURSE MANAGER'S SURVIVAL GUIDE, 4TH EDITION Jul 13 2021 Nurses are already nurse managers. They must manage patient caseloads and care plans as well as supervise aides, technicians, and other care providers. But moving from this type of organic management to a defined nurse manager role is not a natural progression. Nurse managers must command a vast, diverse, and robust skill set, and those skills must first be defined, explained, and operationalized for success. In an environment that offers new managers little support, where do they turn? The Nurse Manager's Survival Guide (4th Ed.) provides an overview of a nurse manager's major roles and responsibilities—all the fundamentals needed for success in one easy-to-use, consolidated, practical reference. From tips on building the right team to budgeting basics, time-management tools, and advice on taking care of one's self (and their team), author Tina Marrelli supplies the resources nurse managers need to excel in day-to-day operations.

Anatomy of Writing for Publication for Nurses, Fourth Edition Jun 12 2021
"Writing well is not the result of luck or innate talent. Writing is a skill you can learn, just as you learned nursing skills such as venipuncture and suctioning. However, nurses often find it challenging to write. After all, as Margaret McClure says in *Words of Wisdom From Pivotal Nurse Leaders*, "One of nursing's biggest handicaps is that we are in a field where your basic practice requires that you never write in complete sentences" (Houser & Player, 2008, p. 70). This book is designed to help you bridge the gap between incomplete sentences and a published manuscript. The book's contributors include the best and the brightest from publishing today. Many of the contributors have experience as editors of nursing journals, where their role is to decide which articles to accept for publication. These decision-makers share important insights that will enhance the likelihood your manuscript is accepted for publication. You also can draw a wealth of knowledge from the many years of writing experience that the contributors bring to this book. These authors have a long history of success in having their work published; the important tips they share will set you on track to seeing your work in print or online"--

Clinical Teaching Strategies in Nursing, Fourth Edition Jun 24 2022 Named a 2013 Doody's Core Title and Essential Purchase! Praise for the Third Edition: "I recommend this book as an introduction to new educators involved in clinical teaching." -Journal for Nurses in Staff Development The fourth edition of this

highly acclaimed text continues to provide a comprehensive framework for planning, guiding, and evaluating learning activities for graduate and undergraduate nursing students in numerous clinical settings. A respected resource for clinical faculty, it addresses the distinct requirements of clinical learning as opposed to classroom learning and provides proven strategies to maximize clinical education. The revision features expanded content on teaching graduate students, regulatory issues affecting distance education, and the use of social media. It covers establishing and using dedicated education units (DEUs), the challenges of student access to electronic health records and documentation of care, and reducing the demands of clinical staff members when multiple students rotate through a particular setting. Additionally, this edition provides guidelines for using preceptors, evaluating multimedia, and observing students in practice; sample observation guidelines, learning assignments, and clinical learning activities; and sample policies for clinical evaluation and adherence to professional conduct standards. It includes the latest revisions of the NCLEX test plan and the AACN Essentials guidelines for nursing education. The instructor's manual, which includes learning activities for each chapter and teaching suggestions, and PowerPoint presentations accompany the text. New to the Fourth edition: Two completely new chapters: the first "Developing Clinical Learning Sites," and the second "Pedagogical Technologies for Clinical Education" Expanded approaches for meeting the clinical needs of graduate students Regulatory issues affecting distance education across state lines Using social media Discussion of benefits of DEUs and practical suggestions for developing them as clinical teaching sites Important content regarding the NLN CNETM Examination Detailed Test Blueprint Challenges of student access to electronic health records Guidelines for using preceptors, evaluating multimedia, and student observation Sample observation guidelines, learning assignments, and clinical learning activities and sample policies for clinical evaluation and professional conduct standards

Palliative Care Nursing, Fourth Edition Jul 25 2022 Praise for the Third Edition: "In this comprehensive textbook on palliative care nursing, editors Marianne Matzo and Deborah Witt Sherman succeed in bringing together the heart of nursing and the true meaning of palliative care with the most current evidence based practice." --GeriPal This fourth edition of a comprehensive text/reference that has been valued by students, educators, and practicing nurses for many years, Palliative Care Nursing continues to reflect the fundamental hospice and palliative care nursing competencies---both basic and advanced---that are essential for effective and empathetic care of patients and families. This new edition reflects the tremendous growth of this vital discipline into the mainstream of health care and focuses on palliative care that is responsive to the demand for health care reform in America and globally. It provides the knowledge, scientific evidence, and skills needed by nurses to address the complex physical, emotional, social, sexual, and spiritual needs of patients and families within the context of a changing health care delivery system. With a focus on inter-professional collaboration, the book emphasizes the value of complementary, holistic models in promoting health and wholeness across the illness trajectory, even as death

approaches. The book is edited by Project on Death in America Faculty Scholars, who have worked to develop, implement, and evaluate nursing initiatives in palliative care in the U.S. and internationally. With a focus on both quality of life and economic imperatives, interdisciplinary authors describe the management of specific diseases and related physical and psychological symptoms, and care of patients during the dying process. They cover assessment of key symptoms and pharmacological, non-pharmacological, and complementary interventions. Taking a life-span approach, the book includes age-appropriate nursing considerations. Key points at the beginning of each chapter and callouts containing evidenced-based information highlight best practices. The text also examines relevant legal, ethical, and cultural considerations and offers case studies with conclusions in each clinical chapter. New to the Fourth Edition: Thoroughly revised and expanded Three new chapters addressing palliative care amidst health care reform, rehabilitation in chronic or serious illness, and post-traumatic stress disorder A conceptual framework table in each chapter identifying the National Quality Forum Domains of Palliative Care and Basic and Advanced Palliative Care and Hospice Nursing Competencies Updated evidence-based callouts that review the highest-quality studies
