[Integrated Pest Management in Diverse Cropping Systems](#) Nov 07 2020 Climate change has intensified in recent decades, which has affected crop production as well as facilitated the emergence of new diseases and insect pests, causing serious threats to agriculture. Farmers have mostly taken a crop-based approach to insect pest management (IPM); the authors of this new volume, however, take the unique approach that IPM based on specific cropping systems is more efficient, resulting in reduced cultivation costs, increased yield and profitability, and decreased residue from crop produce and products. This volume presents the results of research done by crop protection scientists on integrated pest management in diverse cropping systems based on rice, wheat, maize, pulses, food legumes, oilseeds, groundnut, potato, and other horticulture crops. With chapters written by well-known and experienced scientists in their fields, this volume provides in-depth knowledge on integrated pest management in conjunction with an array of specific cropping systems, taking into consideration all the elements, including the crops, crop sequences, spatial and temporal aspects of managing an agricultural system, and other aspects. This volume will be valuable for entomologists, plant pathologists, and agronomists, as well as for farmers—both small and industrial sized, agricultural extension centers, faculty and students, and many others involved with crop cultivation.

Research Handbook of Investing in the Triple Bottom Line Aug 05 2020 The triple bottom line is an accounting framework with social, environmental and financial factors. This Handbook examines the nexus between these areas by scrutinising aspects of socially responsible investment, finance and sustainable development, corporate socially responsible banking firms, the stock returns of sustainable firms, green bonds and sustainable financial instruments.

The Feminization of Poverty in Rich Nations Jun 02 2020 The first book to study women's poverty over the life course, this outstanding collection compares the economic condition of single mothers and single elderly women--while also considering partnered women and immigrants--in eight wealthy but diverse countries. By identifying the social and economic policies that enable women to live independently, *Poor Women in Rich Countries* provides nothing less than a blueprint for abolishing women's poverty.

Enhancing Urban Safety and Security Jul 24 2019 *Enhancing Urban Safety and Security* addresses three major threats to the safety and security of cities: crime and violence; insecurity of tenure and forced evictions; and natural and human-made disasters. It analyses worldwide trends with respect to each of these threats, paying particular attention to their underlying causes and impacts, as well as to the good policies and best practices that have been adopted at the city, national and international levels in order to address these threats. The report adopts a human security perspective, concerned with the safety and security of people rather than of states, and highlights issues that can be addressed through appropriate urban policy, planning, design and governance.

Politics, Work, and Daily Life in the USSR Apr 24 2022 This book illustrates how the Soviet social system works and how the Soviet people cope with it.

EU Regulation of E-Commerce Jan 28 2020 Significantly revised and expanded, this important book addresses the key pieces of EU legislation in the field of e-commerce, including on consumer rights, copyright, electronic identification, open internet access, electronic payments, competition law and digital content.

The Art of Miniature Painting May 26 2022

[Women's Entrepreneurship and Economics](#) Sep 05 2020 Over the past century, an extensive literature has developed, exploring the impact of entrepreneurship on economic performance. The active participation of entrepreneurs in virtually all aspects of business and economic activity has obliged policy makers within the global economy to consider entrepreneurship as a determining variable in any political force, not only for bodies and groups created specifically to this end, but also for any decision-making body. To this end, specific actions promoting entrepreneurship have already been established around the world. However, the particular dynamics of entrepreneurship by women present unique opportunities and challenges. The women's perspective has often been overlooked in research, practice, and policymaking, and yet yields rich insights and implications. This volume features research from an international array of authors, global data, and in-depth analysis of women's entrepreneurial activity in Europe, Latin America, the United States, and Canada, to shed light on the positive impact of women's entrepreneurship on economic growth and development. The first part covers a broad range of concepts relating to the history and context of the female economic perspective. The second part focuses on performance and success factors, with respect to such issues as innovation, social needs, and entrepreneurial orientation. The third part addresses issues of financing, including discussion of access to capital, microcredit, and entrepreneurial behavior. The fourth part considers additional topics, such as work-family balance and access to education. Together, the chapters offer new perspectives on the unique characteristics of women entrepreneurs and their contributions to economic development in theory, practice, and policymaking.

Putting Higher Education to Work May 02 2020 This book assesses whether East Asian higher education is providing research and innovation for growth and delivering its graduates with the skills necessary for productivity in the labor market. It also seeks to determine how higher education systems could be improved in order to deliver these outcomes. It features new data and diagnostic material to better understand labor

markets, what skills firms want, and what skills graduates have; shows how countries can become more innovative; and describes in detail the key areas of reform needed for higher education to be a larger engine of East Asian growth. It will be of interest to policymakers, governments, academia, donors, NGOs, students, researchers, and lower- and middle-income countries looking to break the middle-income trap.

Minority Jurisprudence in Islam Jul 04 2020 According to many Islamic jurists, the world is divided between dar al-Islam (the abode of Islam) and dar al-harb (the abode of war). This dual division of the world has led to a great amount of juridical discussion concerning what makes a territory part of dar al-Islam, what the status of Muslims living outside of this is, and whether they are obliged to obey Islamic jurisprudence. Susanne Olsson examines the differing understandings of dar al-Islam and dar al-harb, as well as related concepts, such as jihad and takfir. She thereby is able to explore how these concepts have been utilised, transformed and negotiated throughout history. As the subject of Muslims living in Europe is such a topical and sometimes controversial one, this book will appeal to researchers of modern Islam as integral to the Western experience.

A General Catalogue of Books Offered to the Public at the Affixed Prices by Bernard Quaritch ... Nov 27 2019

The Handbook of Global Health Communication Apr 12 2021 International in scope, The Handbook of Global Health Communication offers a comprehensive and up-to-date analysis of the role of communication processes in global public health, development and social change Brings together 32 contributions from well-respected scholars and practitioners in the field, addressing a wide range of communication approaches in current global health programs Offers an integrated view that links communication to the strengthening of health services, the involvement of affected communities in shaping health policies and improving care, and the empowerment of citizens in making decisions about health Adopts a broad understanding of communication that goes beyond conventional divisions between informational and participatory approaches

Working Paper Series Oct 31 2022

Local Activism for Global Climate Justice Sep 25 2019 This book will inspire and spark grassroots action to address the inequitable impacts of climate change, by showing how this can be tackled and the many benefits of doing so. With contributions from climate activists and engaged young authors, this volume explores the many ways in which people are proactively working to advance climate justice. The book pays special attention to Canada and the Great Lakes watershed, showing how the effects of climate change span local, regional, and global scales through the impact of extreme weather events such as floods and droughts, with related economic and social effects that cross political jurisdictions. Examining examples of local-level activism that include organizing for climate-resilient and equitable communities, the dynamic leadership of Indigenous peoples (especially women) for water and land protection, and diaspora networking, Local Activism for Global Climate Justice also provides theoretical perspectives on how individual action relates to broader social and political processes. Showcasing a diverse range of inspirational and thought-provoking case studies, this book will be of great interest to students and scholars of climate justice, climate change policy, climate ethics, and global environmental governance, as well as teachers and climate activists.

National Strategies for Regional Integration Mar 12 2021 'National Strategies for Regional Integration: South and East Asian Case Studies' examines how each country's integration with its neighbours and more distant regional economies might be improved. The country cases illustrate the diversity of Asian development experience and offer lessons for other countries and regions interested in developing national strategies to foster regional integration.

Cabinet Government in Australia, 1901-2006 Mar 24 2022 This book presents the first comprehensive study of the development of the central institution of Australian government over the first century of its life.

Total Survey Error in Practice Dec 29 2019 Featuring a timely presentation of total survey error (TSE), this edited volume introduces valuable tools for understanding and improving survey data quality in the context of evolving large-scale data sets This book provides an overview of the TSE framework and current TSE research as related to survey design, data collection, estimation, and analysis. It recognizes that survey data affects many public policy and business decisions and thus focuses on the framework for understanding and improving survey data quality. The book also addresses issues with data quality in official statistics and in social, opinion, and market research as these fields continue to evolve, leading to larger and messier data sets. This perspective challenges survey organizations to find ways to collect and process data more efficiently without sacrificing quality. The volume consists of the most up-to-date research and reporting from over 70 contributors representing the best academics and researchers from a range of fields. The chapters are broken out into five main sections: The Concept of TSE and the TSE Paradigm, Implications for Survey Design, Data Collection and Data Processing Applications, Evaluation and Improvement, and Estimation and Analysis. Each chapter introduces and examines multiple error sources, such as sampling error, measurement error, and nonresponse error, which often offer the greatest risks to data quality, while also encouraging readers not to lose sight of the less commonly studied error sources, such as coverage error, processing error, and specification error. The book also notes the relationships between errors and the ways in which efforts to reduce one type can increase another, resulting in an estimate with larger total error. This book: • Features various error sources, and the complex relationships between them, in 25 high-quality chapters on the most up-to-date research in the field of TSE • Provides comprehensive reviews of the literature on error sources as well as data collection approaches and estimation methods to reduce their effects • Presents examples of recent international events that demonstrate the effects of data error, the importance of survey data quality, and the real-world issues that arise from these errors • Spans the four pillars of the total survey error paradigm (design, data collection, evaluation and analysis) to address key data quality issues in official statistics and survey research Total Survey Error in Practice is a reference for survey researchers and data scientists in research areas that include social science, public opinion, public policy, and business. It can also be used as a textbook or supplementary material for a graduate-level course in survey research methods.

An Unlikely Dilemma Aug 24 2019 In a world where armed conflict, repression, and authoritarian rule are too frequent, human rights and peace-building present key concepts and agendas for the global and local struggle for peace and development. But are these agendas congruent? Do they support each other? Many organizations, states, and individuals have experienced how priorities of one agenda create friction with the other. For instance, are justice and reconciliation incompatible goals? If not, do they lead to counteracting initiatives? How can local and international actors develop support to societies that search a way out of violence and repression without violating universal moral standards, in an imperfect and resource-scarce situation? This study departs from the view that both human rights and peace-building are agendas with specific and unique contributions. In order to deal with overlapping claims that the two agendas sometimes formulate, in both conflict and post-conflict situations, this study suggests specific approaches in order to create

synergy effects of agenda cooperation.

Synopsis Feb 20 2022 Lists the scholarly publications including research and review journals, books, and monographs relating to classical, Hellenistic, Biblical, Byzantine, Medieval, and modern Greece. The 11 indexes include article title and author, books reviewed, theses and dissertations, books and authors, journals, names, locations, and subjects. The format continues that of the second volume. All the information has been programmed onto the disc in a high-level language, so that no other software is needed to read it, and in versions for DOS and Apple on each disc. Annotation copyrighted by Book News, Inc., Portland, OR

World Development Report 2008 Oct 07 2020 The world's demand for food is expected to double within the next 50 years, while the natural resources that sustain agriculture will become increasingly scarce, degraded, and vulnerable to the effects of climate change. In many poor countries, agriculture accounts for at least 40 percent of GDP and 80 percent of employment. At the same time, about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods. 'World Development Report 2008' seeks to assess where, when, and how agriculture can be an effective instrument for economic development, especially development that favors the poor. It examines several broad questions: How has agriculture changed in developing countries in the past 20 years? What are the important new challenges and opportunities for agriculture? Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa? How can agricultural growth be made more effective for poverty reduction? How can governments facilitate the transition of large populations out of agriculture, without simply transferring the burden of rural poverty to urban areas? How can the natural resource endowment for agriculture be protected? How can agriculture's negative environmental effects be contained? This year's report marks the 30th year the World Bank has been publishing the 'World Development Report'.

Monthly Catalog, United States Public Documents Dec 21 2021

Development and the Next Generation Mar 31 2020 "The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems preparing young people to cope with the demands of changing economies? What kind of support do they get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV-AIDS and drug abuse? Can their creative energy be directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter."

Routledge Handbook of Climate Justice Feb 29 2020 The term "climate justice" began to gain traction in the late 1990s following a wide range of activities by social and environmental justice movements that emerged in response to the operations of the fossil fuel industry and, later, to what their members saw as the failed global climate governance model that became so transparent at COP15 in Copenhagen. The term continues to gain momentum in discussions around sustainable development, climate change, mitigation and adaptation, and has been slowly making its way into the world of international and national policy. However, the connections between these remain unestablished. Addressing the need for a comprehensive and integrated reference compendium, The Routledge Handbook of Climate Justice provides students, academics and professionals with a valuable insight into this fast-growing field. Drawing together a multidisciplinary range of authors from the Global North and South, this Handbook addresses some of the most salient topics in current climate justice research, including just transition, urban climate justice and public engagement, in addition to the field's more traditional focus on gender, international governance and climate ethics. With an emphasis on facilitating learning based on cutting-edge specialised climate justice research and application, each chapter draws from the most recent sources, real-world best practices and tutored reflections on the strategic dimensions of climate justice and its related disciplines. The Routledge Handbook of Climate Justice will be essential reading for students and scholars, as well as being a vital reference tool for those practically engaged in the field.
